*sequence* The sequence number of the last request processed by the X11 server.

*length* The length of the reply, in words (a word is 4 bytes).

*atom* TODO: NOT YET DOCUMENTED.

*nbytes* TODO: NOT YET DOCUMENTED.

## DESCRIPTION

### RETURN VALUE

Returns an *xcb\_xfixes\_get\_cursor\_name\_cookie\_t*. Errors have to be handled when calling the reply function *xcb\_xfixes\_get\_cursor\_name\_reply*.

If you want to handle errors in the event loop instead, use *xcb\_xfixes\_get\_cursor\_name\_unchecked*. See **xcb-requests(3)** for details.

### ERRORS

This request does never generate any errors.
