NAME

xkbcli interactive-x11 - interactive debugger for XKB keymaps

SYNOPSIS

xkbcli interactive-x11 [*options*]

DESCRIPTION

xkbcli interactive-x11 is a commandline tool to interactively debug XKB keymaps by listening to X11 events.

This requires an X server to be running.

Press the <Escape> key to exit.

This is a debugging tool, its behavior or output is not guaranteed to be stable.

--help   Print help and exit
