NAME

xkbcli list - list available XKB models, layouts, variants and options

SYNOPSIS

xkbcli list [*/path/to/xkbbase* [*/path/to/xkbbase*] ...]

DESCRIPTION

List available model, layout, variant and option (MLVO) values from the XKB registry. The output is in YAML 1.2 format.

Positional arguments are treated as XKB base directory installations.

--help　　Print help and exit

--verbose

Increase verbosity, use multiple times for debugging output

--ruleset *name*

Load the ruleset with the given name

--skip-default-paths

Do not load the default XKB include paths

--load-exotic

Load exotic (extra) layouts
