

NAME

xo_flush, **xo_flush_h** - flush formatted output from libxo handle

LIBRARY

Text, XML, JSON, and HTML Output Emission Library (libxo, -lxo)

SYNOPSIS

```
#include <libxo/xo.h>
```

```
xo_ssize_t
```

```
xo_flush(void);
```

```
xo_ssize_t
```

```
xo_flush_h(xo_handle_t *handle);
```

DESCRIPTION

libxo buffers data, both for performance and consistency, but also to allow some advanced features to work properly. At various times, the caller may wish to flush any data buffered within the library. The **xo_flush()** function is used for this.

SEE ALSO

xo_emit(3), libxo(3)

HISTORY

The **libxo** library first appeared in FreeBSD 11.0.

AUTHORS

libxo was written by Phil Shafer <phil@freebsd.org>.
