

NAME

zip_error_init, **zip_error_init_with_code** - initialize zip_error structure

LIBRARY

libzip (-lzip)

SYNOPSIS

```
#include <zip.h>
```

void

```
zip_error_init(zip_error_t *error);
```

void

```
zip_error_init_with_code(zip_error_t *error, int ze);
```

DESCRIPTION

The **zip_error_init()** function initializes the zip_error pointed to by *error*. **error* must be allocated before calling **zip_error_init()**.

The **zip_error_init_with_code()** function does the same, but additionally sets the zip error code to *ze* and sets the system error code to the current `errno(3)` value, if appropriate.

SEE ALSO

libzip(3), zip_error_fini(3)

HISTORY

zip_error_init() and **zip_error_init_with_code()** were added in libzip 1.0.
