

NAME

zip_source_free - free zip data source

LIBRARY

libzip (-lzip)

SYNOPSIS

```
#include <zip.h>
```

void

```
zip_source_free(zip_source_t *source);
```

DESCRIPTION

The function **zip_source_free**() decrements the reference count of *source* and frees it if the reference count drops to 0. If *source* is NULL, it does nothing.

NOTE: This function should not be called on a *source* after it was used successfully in a **zip_open_from_source**(3), **zip_file_add**(3), or **zip_file_replace**(3) call.

SEE ALSO

libzip(3), zip_source(3), zip_source_keep(3)

HISTORY

zip_source_free() was added in libzip 0.6.
