

NAME

zip_stat_init - initialize zip_stat structure

LIBRARY

libzip (-lzip)

SYNOPSIS

```
#include <zip.h>
```

void

```
zip_stat_init(zip_stat_t *sb);
```

DESCRIPTION

The **zip_stat_init()** function initializes the members of a struct `zip_stat`. The current members are described in `zip_stat(3)`, but this function should be used to initialize it to make sure none are missed. The structure pointed to by *sb* must be allocated before calling **zip_stat_init()**.

This function should be used by functions provided to `zip_source_function(3)` when returning `ZIP_SOURCE_STAT` information to make sure all fields are initialized.

RETURN VALUES

If *sb* is valid, the function is always successful.

SEE ALSO

libzip(3), zip_stat(3)

HISTORY

zip_stat_init() was added in libzip 0.8.
